AGRICULTURAL OUTLOOK CHARTS

1941

Charts for Local Outlook Meetings

The charts in this book, have been selected by the Outlook Committees as those best adapted for presenting graphically the economic background for the respective commodities. These charts have been simplified from year to year and have been brought up to date so far as data were available for the Outlook Conference in October 1940. Copies of these charts in the wall-size, 30 x 40 inches, will be made by the Bureau on order for 10 cents each on blueprint paper, 20 cents each on blackline paper. The source of the data for keeping these charts up to date, if available currently, is indicated in the list.

Other charts or maps issued by the Bureau of Agricultural Economics not included in the chart books or this list are supplied at 75 cents each on bromide paper, or \$1.25 mounted on cloth. For a list of the Bureau's charts see "Agricultural Economics Charts," mimeographed, June 1937, and supplement of January 1939.
